Goal: MIHS will provide an equitable and accessible academic experience for all students across all content areas. We will accomplish this through the following sub-goals:

1. By the end of the 2017-2018 school year 100% of the identified 37 core courses (per graduation requirements) will have common course outlines, prioritized standards, and at least two common assessments. Additionally, 100% of the identified 29 elective and new core courses will have common course outlines, prioritized standards, and at least two common assessments.

2. Our EES staff feedback scores will improve in the following areas which will inform our progress towards our goal:
   - This school uses assessments aligned to standards and instruction - We will increase from 66% to 80% of staff answering almost always/often true
   - I participate in a professional learning community focused on improving student learning - We will increase from 74% to 80% of staff answering almost always/often true
   - The staff I work with collaborates to support improvement efforts - We will increase from 75% to 90% of staff answering almost always/often true
   - Common benchmark assessments are used to inform instruction - We will increase from 54% to 60% of staff answering almost always/often true

Fundamental 5: Cultivate and foster thinking and process skills such as analytical and critical thinking, cross-disciplinary thinking, creativity, innovation, collaboration, communication, problem-solving, and information and technology literacy in curriculum design.

Contextual Data:

3 Year Vision
We aspire to be a highly reliable school that provides:
- a safe and collaborative culture;
- effective teaching in every classroom; and
- a guaranteed and viable curriculum.
We want to employ systems and structures within the school that are not centered solely on individual staff members, but instead are founded on our collective beliefs as a school community. We believe it’s important for students to know that what they learn in each class is going to be consistent across classrooms, which is congruent with components of OE-10: Ensure that comparable curricular and instructional expectations are applied within departments and/or grade levels without sacrificing freedom and autonomy. The how the teachers and students get there is not the conversation we are trying to direct. However, when we share a common goal for what students will learn, we can have purposeful conversations as colleagues with a similar focus and plan. This work is supported by recommendations from the Diversity Action Committee that include: more teacher-to-teacher dialogue about student learning; more sharing of best practices; and providing an adaptable curriculum that gives teachers opportunities to make sure students are understanding (MISD DAC minutes, May 2017).

We based our plan on the best practices outlined by Rick DuFour’s Professional Learning Communities. “Educators rename their traditional faculty or department meetings as PLC meetings, engage in book studies that result in no action, or devote collaborative time to topics that have no effect on student achievement – all in the name of the PLC process. These activities fail to embrace the central tenets of the PLC process and won’t lead to higher levels of learning for students or adults.” They list the characteristics of a true professional learning community:

- teacher team takes collective responsibility for students’ learning;
- a guaranteed and viable curriculum is established, specifying the knowledge, skills, and dispositions students are expected to acquire, unit by unit;
- frequent, common, team-developed interim assessments measure students’ mastery of the curriculum, which identify the students who need additional time and support and those students who would benefit from enriched or extended learning;
- teachers’ individual strengths and weaknesses based on what their students learned; and
- a system of interventions which guarantees that struggling students get additional time and support in ways that don’t remove them from new instruction.

All this flows from the four questions school staff are continuously asking themselves: What do we want students to learn? How will we know if they have learned it? What will we do if they haven’t learned it? How will we provide extended learning opportunities for students who have mastered the content?” (“The Futility of PLC Lite” by Rick DuFour and Douglas Reeves in Phi Delta Kappan, March 2016 (Vol. 97, #6, p. 69-71).

Although we are entering our third year focused on departmental and course-specific PLC work, DuFour and Reeves support that the collaborative work is “an ongoing series of recursive cycles of collective inquiry and action research in order to achieve better results for the students they serve. (“Professional Learning Communities Still Work (If Done Right)” by Rick DuFour and Douglas Reeves in Education
Week, October 2015). Consultant and author, Mike Schmoker confirms that schools need to sustain a “disciplined, laser-like focus for a significant amount of time. Time and energy are precious, limited resources and if we squander them on too many initiatives or on the wrong ones, we will fail. Less is more.” (“The Power of Focus” by Mike Schmoker in Principal Leadership, January 2017, p. 42-45). Additionally, our work is supported by research that explains that in order to make significant improvements in the teaching and learning for students, teachers must be provided time for collaboration, opportunities to plan and design common, high-quality instructional materials and assessments, and embedded professional development that is “an integral part of teacher teamwork around strategies, goals, and analysis of student work.” (“Problems with Teaching Lie in the Profession” by Jack Schneider in Education Week, April 2015 (Vol. 34, #27, p. 20-21).

### Goal 1 Strategic Plan:

**Strategic Actions**

Create common course outlines, prioritized standards, and at least two common assessments for each identified course with support and additional time from MIHS administrators

**Progress Indicators**

- 10 monthly DD (District Directed) meetings are dedicated to completing this work. Department chairs are charged with leading their departmental PLCs through this work with support and guidance from their departmental administrative liaisons.

**Anticipated Artifacts and Evidence**

- Meeting agendas/minutes from departmental PLCs
- Common course outlines created by departments for identified courses
- Common assessments created by departments for identified courses
Specific example: New, diverse texts will be adopted and/or piloted at all four grade levels in English and course-specific PLCs will create new curriculum and assessments to accompany the new texts.

**Goal 2 Strategic Plan:**

<table>
<thead>
<tr>
<th>Strategic Actions</th>
<th>Progress Indicators</th>
<th>Anticipated Artifacts and Evidence</th>
</tr>
</thead>
</table>
| Engage Professional Learning Communities (PLCs) that focus on analyzing student achievement on the established common assessments using identified protocols for collaborative work | • Department Chairs will receive training and information about how to lead PLCs that focus on student achievement from administrators during Principal’s Cabinet meetings  
• Building administration will provide research-based protocols specifically designed for teachers to use to analyze student work  
• Departments will meet in PLCs to analyze student achievement on established common assessments using protocols | • Meeting agendas/minutes  
• Student achievement results and reflections from at least two administered common assessments for identified courses |
Identify, discuss, and implement interventions for students who are not meeting standards or making sufficient progress

- Faculty, DD, BGT (Building Guidance Team), department, and Principal’s Cabinet meetings will be used to identify and discuss intervention strategies
- Improved student achievement as a result of implemented interventions

Meeting agendas/minutes
- BGT minutes
- Student achievement on common assessments demonstrating improvement based on implemented interventions

</table>
Goal: MIHS will foster a school community that celebrates diverse cultures and addresses issues of equity and inclusion. We will accomplish this through the following goals:

- All students and staff will feel welcome at MIHS as measured by the EES indicators.
- All students will have access to an equitable academic experience.

Fundamental 7: Foster diversity, inclusiveness, and equity with a focus on respect and acceptance of every student. School: Mercer Island High School.

<td>62% to 72% (10% increase)</td>
</tr>
</tbody>
</table>

Context: Entering our fourth year of diversity work we have much to be proud of. We have successfully engaged our staff and students in discourse around diversity, equity and inclusion. This past year we addressed concepts such as privilege, empathy and instructional supports for all types of learners. Staff and students experienced the opportunity to self-reflect, which is an important
early step, when examining these topics: diversity, equity and inclusion. We also analyzed proportionality data in course enrollment for AP and Honors classes. We are taking strategic actions to encourage underrepresented student groups to enroll in some of these courses. Examples are students with IEPs, gender gaps, and disproportionate racial representation.

This year our Diversity Action Team (DAT) is even more diverse and equally committed to this work. As a DAT, we look forward to continuing the discussion around self-awareness but also taking a closer look at structural barriers and systems of oppression. This will ground our staff and students in the “why” this work is so important. We will also attempt to move beyond race and ethnicity to explore the many faces of diversity. We are going to provide professional development to staff around having, “courageous conversations with students.” This skill will equip our teachers to provide safe environments to have conversations with students in which the subject matter has the potential to be emotionally charged. As always, this work will be difficult and challenging but is worth the energy and emotion it will take to accomplish these goals. The MIHS staff and administration believe MIHS can be a leading school in the way it looks at and addresses diversity, equity and inclusion issues. While we are still at the infancy of this work, our motivation and efforts will undoubtedly create an environment that is culturally responsive to all our stakeholder’s needs.

### Cultural Competence

|-------------|                                                               |          |          |           |                 |
| **Staff**   | This school has activities to celebrate the diversity of this community | 35%      | 44%      | 59%       | 65%             |
| **Staff**   | The school addresses issues of diversity in a timely and effective manner | 43%      | 49%      | 41%       | 50%             |
| **Student** | The school has activities to celebrate student differences     | 42%      | 70%      | 64%       | 90%             |
| **Parent**  | The school addresses issues of diversity in a timely and effective manner | 41%      | 56%      | 50%       | 72%             |

All percentages represent an answer of almost always or often true.

| **Train staff and students in the **Awareness** domain of the Cultural Competency Framework.**  
Engage staff and students in the process of becoming aware of his/her assumptions about human behavior, biases, preconceived notions and personal limitations. | **●** DAT meetings to discuss framework and develop common understanding of concepts and definitions relating to our work  
**●** Plan and execute Bridges lessons  
**o** Workshop format  
**●** Plan diversity/equity summit  
**●** Self Identity activity for staff and students | **●** Meeting minutes  
**●** Staff survey  
**●** Bridges lessons  
**●** Student survey  
**●** Diversity Summit |
| Cross Cultural Competency Framework: **Awareness, Knowledge, Skills, Advocacy** |                                                      |                                                |
| **Train staff and students in the **Knowledge** domain of the Cultural Competency Framework.**  
Develop staff and student understanding of the worldview of culturally diverse students, staff families and communities (values, practices, communication styles group norms, biases experiences and perspectives). | **●** Meetings and trainings for DAT and staff around common vocabulary and framework  
**●** Examine different aspects of diversity and build stakeholders knowledge and understanding of such diverse groups  
**●** Examine the structural and systemic pillars of oppressive policies.  
**●** Develop school-wide themes around diversity | **●** DAT meeting minutes  
**●** Staff meeting minutes  
**●** Staff survey  
**●** Student survey  
**●** Bridges lessons |
| Cross Cultural Competency Framework: **Awareness, Knowledge, Skills, Advocacy** |                                                      |                                                |
Train staff and students in the **Skills** domain of the Cultural Competency Framework.

Practice and strengthen appropriate, relevant and sensitive strategies and skills in working with diverse students, staff, families and communities.

Cross Cultural Competency Framework: Awareness, Knowledge, **Skills**, Advocacy

- Research classroom-based instructional strategies that promote inclusion and equity and create database for teachers to access
- Deliver staff PD on instructional practices
- Development of student-led activities
- Develop school-wide themes around diversity
- Professional development for staff around “having courageous conversations”

- Lesson plans/instructional strategies
- Feedback from lesson plans/instructional strategies
- Data collected from feedback forms
- Collection of instructional strategies that promote equity
- Exit tickets
- Post activity survey
- Diversity week

Train staff and students in the **Advocacy** domain of the Cultural Competency Framework.

Staff and students will advocate on behalf of the needs of the students, staff, families and communities they work with.

Cross Cultural Competency Framework: Awareness, Knowledge, **Skills**, Advocacy

- Examining student access to all classes
- Create student-led opportunities around diversity and equity
- Celebrate diversity (especially the less recognized)

- DAT meeting minutes
- Data from school-wide activities
- DAT committee member reflections
- Student driven equity campaign
- Student survey
- Proportionality reports for all class

On October 9, 2015, Ben Ibale from Washington Education Association addressed the Mercer Island School District’s Diversity Action Teams. In his presentation about Culturally Responsive Instructional Strategies he referenced the Cross Cultural Competency Framework. The pillars of the framework are: **Awareness, Knowledge, Skills, and Advocacy**. This year Mercer Island High School will again use this framework to center our lenses as we continue to do this work. We have some exciting activities to engage staff and students in the work. Some activities include having a lunchtime speaker series that will engage students in discussions around different diversity topics; student driven equity campaigns, and teachers sharing of instructional strategies that promote equity.
Through our comprehensive training around the cultural competency framework we expect students to have a clearer understanding of themselves and their role in the world as it relates to diversity, equity and inclusion. We also want all students and staff to feel welcomed at MIHS and for all students to have an equitable academic experience. This concept is important because it is one thing to train staff and students and another to hold them accountable for acting differently.
